FFA WILDLIFE STRIKE ANALYSIS

For my project, I have chosen option 2: FAA Wildlife Strikes Dataset. This dataset shows different collision incidents with aircraft and animals in the United States

Main Question

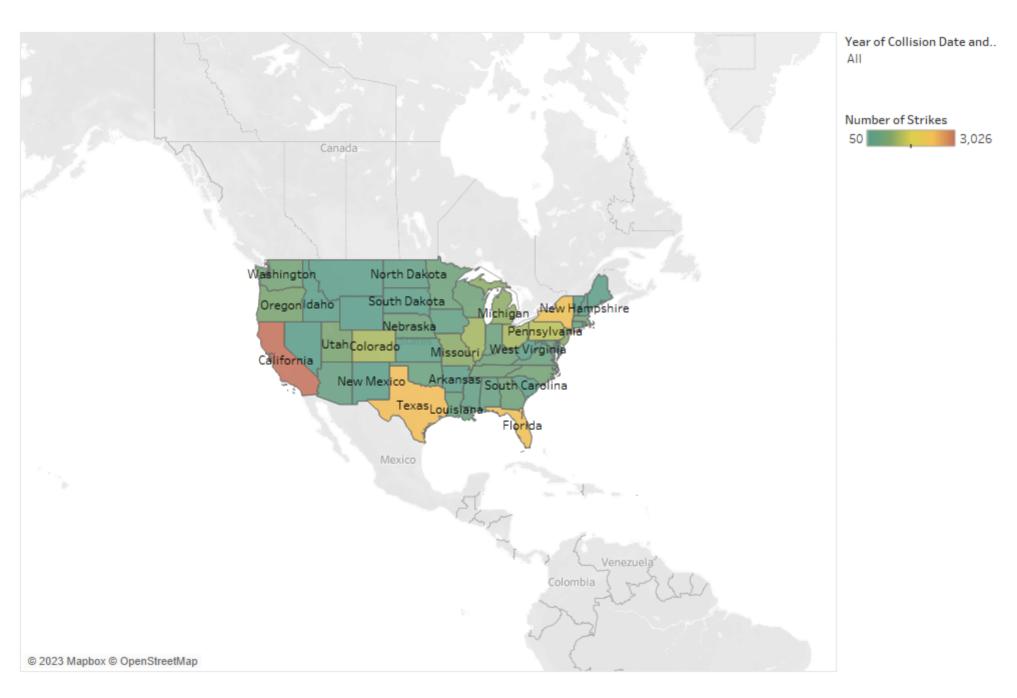

My main question of this analysis is exploring how we can reduce the amount of wildlife strikes in the United States.

Goals

My goal is to create visualizations that show causes for higher strikes so we can pinpoint these causes and find a solution to minimize collisions.

If I had a bit more time I would add more viualizations/interactions, etc. In the future, I hope to add more visualizations and key story points to my project.
